740 CRi

The Stormway 740 CRi is a daycruiser that offers the best of both worlds. An extremely fast and lightweight hull guarantees speed and sea performance as in a real performance boat.
With innovative design, space, functional solutions, comfort and safety, this is also a modern Scandinavian boat for the family.
With the Stormway CRi Inboard you have the choice of an economical diesel engine or a powerful gasoline engine. With an inboard engine, you get a lower center of gravity in the boat, which gives a slightly calmer performance at high speed. A sunbed and double swimming platform invites for good days out on the water.
